Let Us Learn About Mercury

Look up the reader 'Earth and Beyond' and answer the questions related to Planet Mercury.
Colour the image.

Did You Know...?

Mercury doesn't have any moons? This is because it is too close to the Sun. The Sun is so huge (massive) that its strong gravity would suck a moon away in a second!

Colour: _____

Position from the Sun: _____

Size: _____

Two distinctive characteristics:

1) _____

2) _____

One fascinating fact: _____

Look for Mercury close to the horizon in the western sky for an hour after sunset or in the eastern sky for an hour before sunrise.
